JAVNO KOMUNALNO PREDUZEĆE
"KOMUNALAC" DOO TUZLA

Na osnovu člana 69. stav (3), člana 70. st. 4., Zakona o javnim nabavkama ("Službeni glasnik BiH", broj 39/14), a u postupku javne nabavke robe dizel goriva (euro 5) za teretna motorna vozila broj 938-1-1-1-14/14 objavljen u "Službenom glasniku BiH", broj 26/14 dana 07.04.2014. godine, direktor preduzeća je donio

ODLUKU**O OTKAZIVANJU POSTUPKA JAVNE NABAVKE****Član 1.**

Otkazuje se postupak javne nabavke robe dizel goriva (euro 5) za teretna motorna vozila iz dokazivih razloga koji su izvan kontrole ugovornog organa i koji se nisu mogli predvidjeti u vrijeme pokretanja postupka javne nabavke.

Član 2.

Ova odluka objavit će se na web-stranici www.komunalac.com.ba, istovremeno s upućivanjem ponuđačima koji su učestvovali u postupku javne nabavke i objavom u "Službenom glasniku BiH", shodno članu 70. stav (6) Zakona o javnim nabavkama.

Član 3.

Ova odluka stupa na snagu danom donošenja i dostavlja se svim ponuđačima koji su učestvovali u postupku javne nabavke, u skladu sa članom 71. stav (2) Zakona o javnim nabavkama.

Образложење

Postupak javne nabavke pokrenut je Odlukom o pokretanju postupka javne nabavke broj 05-501/14 od 19.03.2014. godine.

Javna nabavka je provedena putem otvorenog postupka uz objavljivanje obavještenja u "Službenom glasniku BiH", broj 26/14.

Procijenjena vrijednost javne nabavke bez PDV-a je 545.000,00 KM.

Obavijest o nabavci broj 938-1-1-1-14/14 od 02.04.2014. godine.

Zahtjev za dostavu ponuda je proslijeđen sljedećim ponuđačima:

- "HIFA" PETROL d.o.o. Sarajevo
- "JUNUZOVIC KOPEX" d.o.o. Lukavac
- "PETROL BH OIL COMPANY" d.o.o. Sarajevo
- "HIFA" d.o.o. Tešanj
- "POLO" d.o.o. Kalesija
- "HOLDINA" d.o.o. Sarajevo
- "GREEN OIL" d.o.o. Sarajevo
- "SUPER PETROL" d.o.o. Banja Luka

Ponuđač "Super petrol" d.o.o. Banja Luka je uložio prigovor na tendersku dokumentaciju koji je ugovorni organ odbio.

Nakon odbijenog prigovora, ponuđač "Super petrol" d.o.o. Banja Luka je dana 30.04.2014. godine uložio žalbu na tendersku dokumentaciju, te je ugovorni organ donio odluku o obustavljanju postupka do okončanja postupka po odluci URŽ.

Nakon ulaganja žalbe, URŽ u Sarajevu se oglasio nenadležnim do osnivanja ispostava ureda u Mostaru i Banja Luci. Nakon osnivanja ispostava, URŽ u dva navrata u 2015. godini nije odgovorio na upit ugovornog organa a dalje postupanje u ovom predmetu, obzirom da do današnjeg dana nije donesena odluka od strane URŽ.

Javna nabavka predmetne robe je bila predviđena za 2014. godinu, koja je istekla.

Ured za razmatranje žalbi je u skladu sa članom 111. stav (11), bio dužan donijeti odluku u roku od 30 dana od dana podnošenja žalbe, što je propustio, a obzirom da je nabavka predmetne robe trebala biti realizovana u 2014. godini, te da su sredstva predviđena za ovu nabavku trebala biti

utrošena u 2014. godini, ugovorni organ smatra da provođenje predmetne nabavke više nema smisla, obzirom da je ista bila predviđena u 2014. godini. Na osnovu svega navedenog ugovorni organ otkazuje javnu nabavku robe dizel goriva (euro 5) za teretna motorna vozila iz dokazivih razloga koji su izvan kontrole ugovornog organa.

POUKA O PRAVNOM LJJEKU

Protiv ove odluke može se izjaviti žalba najkasnije u roku od 10 (deset) dana od dana prijema ove odluke.

Број 01-501-14/16-1

РЕПУБЛИКА СРПСКА
ЈАВНА УСТАНОВА "ВОДЕ СРПСКЕ" БИЈЕЉИНА
INTERNATIONAL INVITATION FOR PREQUALIFICATION
(SERVICE CONTRACT NOTICE)
Flood Risk Management in Republika Srpska
Supervision of Works (2nd Stage)
J.U. Vode Srpske

Publication Reference: 2016001

Procedure: Restricted tender

Programme Title: Emergency Flood Relief and Prevention
Bosnia and Herzegovina - Republika Srpska (RS/BiH)

Financing Sources: European Investment Bank (EIB) and local

Contracting Authority: J.U. Vode Srpske

Contract Type: Consultancy Services - Fee based

Notice Type: Invitation for Prequalification

Issue Date: 22 February 2016

Closing Date: 31 March 2016

Provisional date of invitation to tender: 03 May 2016

The Ministry of Finance and Treasury (MFT) representing Bosnia and Herzegovina and the Ministry of Finance of Republika Srpska (MFRS) (both hereinafter referred to as "the Borrower") has signed a Finance Agreement to receive a loan from the European Investment Bank - EIB (hereinafter referred to as "the Bank") - towards the cost of the Project "Emergency Flood Relief and Prevention". This International Invitation for Prequalification relates to one of the components of the project, namely the Contract for "Supervision of Works (2nd Stage)". This contract shall be signed and implemented by J.U. Vode Srpske (hereinafter referred to as "the Contracting Authority").

Project Definition

The overall objective of the "Emergency Flood Relief and Prevention" is to support national and regional efforts in the development and upgrading of flood protection. The Project concerns the emergency repairs to and construction of key flood protection infrastructure along the Sava River flood plains and its tributaries in Republika Srpska following extensive damages at a large number of locations caused by the flood events of both 2009 and 2010 as well as 2014.

Financial Background

For the execution of the Project, a Finance Contract (FC) was signed by all parties and became effective in May 2012. According to the FC, the total cost of the Project was estimated by the EIB as EUR 98,400,000.

Source	Amount (M EUR)
Own funds	21.6
Credit from the Bank	74.0
EU funds for technical assistance	2.8
Total	98.4

The loan agreement was signed for the first stage for EUR 55,000,000. Presently preparation of loan extension agreement for an additional EUR 19,000,000 is ongoing.

Institutional Structure

In order to monitor the implementation of the Project, a Project Management Unit (PMU) was set up by the Decision of the Government of the Republika Srpska.

The PMU is responsible for the supervision, monitoring and control of the progress of the Project, as well as for reporting to the Government of the RS on the Project's implementation.

The Contracting Authority of this Service Contract and all Works Contracts is Public Utility "Vode Srpske", which is the Main Beneficiary responsible for the management of all contracting arrangements and financial transactions, for the regular monitoring and follow-up on the progress of the project and for informing the PMU on the financial and physical progress. Final beneficiaries of the Project are the Municipalities, farms, industries and public protected within the effective zones of the measures.

The Project is supported by a Technical Assistance Consultant IP4 through the Western Balkans Investment Framework (WBIF) in order to ensure effective and rapid preparation of the investment projects for the development and upgrading of flood protection measures, particularly by preparation of the designs and tender documents, providing assistance for tender evaluation and financial management assistance. The TAs assigned until July 2017.

Current Activities

Present Supervision Consultant has been assigned in September 2013 will finalise its assignment in July 2016.

Up to now, 23 Works Contracts were awarded. Two more tenders are planned to be launched in the two months following this publication. The latter tenders will be implemented following the preparation of designs and Tender Documents by IP4.

The scope of these contracts includes a diversified range of flood protection measures, such as rehabilitation of riverbanks, rehabilitation and/or construction of dykes and channels, cleaning of lateral channels, rehabilitation and/or replacement of bridges, regulation of riverbeds and other related constructions. The works contracts so far follow the FIDIC Red Book model.

Out of the 23 Works Contracts signed, 12 Contracts are completed; 8 are presently ongoing. Three contracts are cancelled (or suspended). These Contracts will possibly be retendered in the near future. The contract volumes vary between Euro 50,000 to 3.5 million.

The total amount of implemented Works until now (excluding those which were cancelled) is approximately EUR 16 million (including the contract extensions). The value of Works that are expected to be finalised within the currently ongoing supervision assignment is approximately EUR 19 million.

The estimated value of the Works to be supervised under this Service Contract is approximately EUR 33 million, excluding the possible extension of the Loan Agreement. The scope of the Works to be supervised are expected to be similar to the ones implemented in the past. It has to be noted that there is one contract under procurement that will follow FIDIC Yellow Book model: the rehabilitation of the drainage pumping stations including rehabilitation of civil structures and supply and erection of electro-mechanical equipment. Majority of Works Contracts will be the Red Book. It is also planned that the Works Contracts will be generally larger than those in the first phase.

The Works Contracts to be supervised will also include some of the ongoing ones, which shall be taken over from the present FIDIC Engineer and the new contracts, which will be awarded during the duration of the services.

Contract Description

The Contracting Authority intends to prequalify firms and joint ventures to tender for the Service Contract to be funded from the loan. The scope of the Contract shall be the continuation of works supervision services for the remaining measures of the Project

This Contract shall include, but not be limited to, the following services:

Supervision of works:

The Contractor shall perform the duties and authority of a FIDIC Engineer as specified in or necessarily implied from the Contract as well as administer the Contract, dealing with situations in accordance with the Contract and taking due regard of all relevant circumstances. The Services shall include the approval of the Works Contractor's design for the design and build contracts, issuing variations and reporting and assessing the claims from the Works Contractor.

Other technical assistance:

Besides the Services as a FIDIC Engineer, the Contractor will assist to the Contracting Authority on demand for preparation of any project documents, including but not limited to designs, feasibilities, tender documents, etc. if instructed; and will provide assistance to the project management.

Commencement Date and Duration:

It is anticipated that the assignment will start in July 2016 with the duration of 36 months.

Maximum Budget available for the Assignment is EUR 1,500,000 Exclusive of VAT.

Eligibility: There are no eligibility restrictions.

Contractor's Profile:

All natural and legal entities or groupings of such persons (consortia) may apply. A consortium may be a permanent, legally-established grouping or a grouping which has been constituted informally for a specific tender procedure. All members of a consortium (i.e., the leader and all other members) are jointly and severally liable to the Contracting Authority.

The participation of an ineligible natural and legal person will result in the automatic exclusion of that person. In particular, if that ineligible person belongs to a consortium, the whole consortium will be excluded.

No more than one application can be submitted by a natural and legal person whatever the form of participation (as an individual legal entity or as leader or member of a consortium submitting an application). In the event that a

natural or legal person submits more than one application, all applications in which that person has participated will be excluded.

Subcontracting:

Subcontracting is not allowed for the supervision services.

Maximum percentage of the Contract Value, which may be subcontracted for "other technical services", if instructed is 10% of the total Contract Value.

Pre-qualification Criteria:

The following selection criteria will be applied to all candidates. In the case of applications submitted by a consortium, the lead partner shall meet not less than 50 percent of all the qualifying criteria for financial and technical capacity. The consortium must satisfy collectively the criteria for professional capacity, for which purpose the relevant figures for each of the partners shall be added to arrive at the consortium's total capacity:

1) Economic and financial capacity of candidate:

The average annual turnover of the candidate must exceed EUR 3,000,000 for the three financial years (2013, 2014 and 2015).

2) Professional capacity of candidate:

At least 10 permanent staff in the last three years (2013, 2014 and 2015) working for the candidate in the fields related to this contract.

The candidate should have a back-up capacity other than the team to conduct the supervision work.

The candidate should have given the company organization and company description in his application.

It is recommended that proposed resident engineers have experience in Western Balkan countries, have required local licences and permits for design and supervision services in Republika Srpska and are able to communicate in local language. Evidence of obligatory licences shall be requested from the successful bidder prior to the signature of the service contract.

3) Technical capacity of candidate:

The candidate should have successfully completed at least four service contracts in the last 5 years prior to the submission deadline of this application (from March 2011 to March 2016). All following sub-criteria shall be covered either under single project or separate projects for each sub-criterion under separate references:

- construction supervision, construction supervision combined with technical assistance and/or design of the river regulation and river bed engineering sector with a minimum value of 500,000 EUR in a single contract (proportion carried out by the candidate); and
- supervision of construction/rehabilitation of pumping station(s) having a minimum capacity of 5 m³/sec (for each pumping station) in a single contract; and
- construction supervision of a minimum of 10 km of dykes and/or lateral channels in a single contract; and
- construction supervision of water, wastewater, storm water or flood management, which is governed by FIDIC contract conditions with a minimum value of 1,000,000 EUR (Red or Yellow Book) (conditions for contracts similar to FIDIC will not be accepted).

Previous experience, which caused breach of contract and termination by a Contracting Authority, shall not be used as reference.

An economic operator may, where appropriate and for a particular contract, rely on the capacities of other entities, regardless of the legal nature of the links, which it has with them. Some examples, of when it may not be considered appropriate by the Contracting Authority are, when the candidates rely in majority on the capacities of other entities or when they rely on key criteria. If the candidate relies on other entities it must in that case prove to the Contracting Authority that it will have at its disposal the resources necessary for performance of the contract, for example by producing an undertaking on the part of those entities to place those resources at its disposal. Such entities, for instance the parent company of the economic operator, must respect the same rules of eligibility and notably that of nationality, as the economic operator. Furthermore, the data for this third entity for the relevant selection criterion should be included in the tender in a separate document. Proof of the capacity will also have to be furnished when requested by the Contracting Authority.

Number of candidates to be shortlisted:

On the basis of the applications received, at least four and at most eight candidates will be invited to submit detailed tenders for this contract. If the number of eligible candidates meeting the selection criteria is less than the minimum of four, the Contracting Authority may invite the candidates who satisfy the criteria to submit a tender.

If more than eight eligible candidates meet the above pre-qualification criteria, the relative strengths and weaknesses of the applications of these candidates must be re-examined to identify the eight best applications for the tender procedure. The only factors, which will be taken into consideration during this re-examination, are:

- Primary factor: the number of the contracts carried out by the candidate (as the lead or with a minimum share of 50% in the consortium/joint venture) fulfilling technical capacity criterion in 3(d).

Secondary factor (which will be implemented if more than eight eligible candidates are available after the implementation of the primary factor): the number of project preferences executed in the Western Balkan Countries.

Language:

All written communications and submissions for this tender procedure and contract must be in English.

Submission Requirements

Interested firms are hereby invited to submit expressions of interest to the address below, on or before 31 March 2016, (16:00 local time). Any application received by the Contracting Authority after this deadline will not be considered.

One original and 2 numbered copies of the applications in English (using the mandatory template) should be submitted by recorded delivery or hand-delivered (upon a signed and dated receipt) to the Contracting Authority in an envelope sealed and marked:
